

**STATEMENT OF POLICY REGARDING EMERGENCY MEDICAL
TREATMENT AND MEDICATION OF PARTICIPANTS IN
CHILDREN'S PROGRAMS**

EMERGENCY MEDICAL TREATMENT POLICY

1. Except for certain designated members of DMNS' Security Staff who are trained in and may administer **limited first aid procedures**, DMNS employees, volunteers or other representatives are not permitted to administer emergency medical treatment to anyone. **If your child requires medication, testing or medical monitoring, he/she must be able to administer it to him/herself.**
2. In the event of any medical or other emergency affecting a participant in a DMNS children's program, DMNS will attempt to notify the child's guardian designated in the application for participation in the program so that person can resolve the emergency.
3. If immediate medical action appears to be required, DMNS will call Emergency Assistance (911) to provide the participant whatever emergency medical or surgical treatment the responding emergency assistance providers deem necessary. Any cost of this emergency assistance is the responsibility of the child's guardian. Neither DMNS nor its employees, volunteers or other representatives are responsible for the care provided the participant by the responding emergency assistance providers or any subsequently involved medical personnel or medical facility.

MEDICATIONS POLICY

1. DMNS employees, volunteers or other representatives are not permitted to accept or administer any type of medication to anyone.
2. If a child might need medication, such as an EpiPen injection for anaphylaxis, during a program, the child's guardian should remain with the child during the program in order to administer the medication.
